

Afficast™ Desulfurizer (DS)

Afficast™ DS is a patented cored wire solution engineered for efficient iron desulfurization prior to nodularization in ductile iron and compacted graphite iron (CGI) production.

This exclusive formulation automates the desulfurization process, delivering a safer, cleaner and more environmentally friendly alternative to traditional methods.

Partner with our technical team to customize cored wire to enhance process control and reduce emissions.

Typical Chemical Analysis

	Ca(%)	Mg(%)
DS - 1	75	25
DS - 2	85	-

Description

Desulfurizer (DS) - calcium based treatments with consistent powder with and compaction within a steel sheath.
